Of the money of reflector on the Telegrafenberg in Petsdam, only on to vibrations caused by heavy trains pass Professor Refimeister (fnu) was asked to give an ad suitable location for the reflector. On 19 May 1954, the mathematics-ratural science divisions for the erection of a technical school for steep on the Oder River. No decision was made.	the erection ments made with sue third were usabling in the vicinit visory opinion on the Academy of the Academy production at Figure 1 production at Figure 28 April	of a ch a s owing yo a more discussed terstenerg
2	new two-meter reflector was discussed. Of the monstration of the Telegrafenberg in Petsdam, only on caused by heavy trains pass to vibrations caused by heavy trains pass Professor Hoffmeister (fnu) was asked to give an adsuitable location for the reflector. On 19 May 1954, the mathematics-natural science division as for the erection of a technical school for stee on the Oder River. No decision was made. At a session of the physics division should correct was decided that the physics division should correct proflems conducted at institutes of the German Academ at institutes of technology.	the erection ments made with sure third were usable ing in the vicinit visory opinion on sion of the Academy production at Figure 28 April attention 28 April attenti	of a ch a s owing yo a more discussed ersteners.
2 1	new two-meter reflector was discussed. Of the measure reflector on the Telegrafenberg in Petsdam, only on caused by heavy trains pass Professor Refineister (fnu) was asked to give an adsuitable location for the reflector. On 19 May 1954, the mathematics-natural science divisorant for the erection of a technical school for steep on the Oder River. No decision was made. At a session of the physics division of the Academy, was decided that the physics division should correct profilems conducted at institutes of the German Academ at institutes of technology.	the erection ments made with sue third were usabling in the vicinit visory opinion on sion of the Academy of the Academy of Sciences, at the Committee of Contral Committee	of a ch a e owing yo a more discussed erstenerg.
2 1	new two-meter reflector was discussed. Of the measure reflector on the Telegrafenberg in Petsdam, only on caused by heavy trains pass Professor Refinalister (fnu) was asked to give an adsuitable location for the reflector. On 19 May 1954, the mathematics-natural science divisorant for the erection of a technical school for steem on the Oder River. No decision was made. At a session of the physics division of the Academy, was decided that the physics division should correct profilems conducted at institutes of the Cerman Academ at institutes of technology. The following members of the DAdW belonged to the SE Dr phill Welfgang Steinitz, professor of Finno-Ugria University, a national prize winner; and Dr Alfred Welfgang Steinitz winner; and Dr Alfred Welfgang Steinitz winner;	the erection ments made with sue third were usabling in the vicinit visory opinion on sion of the Academy of production at Fundamental work on place all works on place	of a ch a e owing yo a more discussed derstenerg 1954, it nyeics universities, an
